GREAT U. OF M.

Attendance at the University Will

Reach Its Maximum This Year. ANN Asson, Sept. 26 .- Speculation is rife as to whether or not the University of Medagan has not reached the top notch in point of numbers and will now go backwards. Many reasons have been presented why this should be so, among them the lengthening of the course in the medical department to four years, and the establishment of the new Chicago university, which it is expected will draw largely from the University of Michigan among western students. While these reasons seem plausible the prospects are now that the attendance here this year will be as large, if not larger, than ever before. The only method of judging is by the number of queries received at the secretary's office. These have been more oungrous than in previous years and that official gives it out that the university will hold its own, at least, One official gives figures and gives the dental department a gain of from 40 to 80, the law department from 30 to 10, the literary department from 100 to 150, and the other depart ments will at least hold their own Should these figures not be over-esti mated the attendance for 1892-3 will run from 2,850 to 2,950.
